

Pulmonary
Hypertension
Association UK

“
**PH
DAY
UK 26**
6th NOVEMBER

WE NEED TO TALK ABOUT PULMONARY HYPERTENSION (PH)

This surgery is supporting PH Day UK 2026
Raising awareness of pulmonary hypertension

PULMONARY
HYPERTENSION
(ALSO KNOWN
AS PH) IS A **RARE
AND SERIOUS LUNG
DISEASE**, WHICH
ALSO AFFECTS THE
HEART

PH CAUSES
HIGH PRESSURE
IN THE BLOOD
VESSELS THAT
CONNECT THE
HEART AND LUNGS
(THE **PULMONARY
ARTERIES**)

THE MOST
COMMON
SYMPTOMS OF PH
ARE **BREATHLESSNESS,
TIREDNESS / FATIGUE,
DIZZINESS AND
CHEST PAIN**

AROUND
8000
PEOPLE IN THE
UK HAVE PH.
THIS INCLUDES
CHILDREN...

THERE ARE
NOW HIGHLY
ADVANCED
TREATMENTS
FOR PH, BUT
**THERE IS STILL
NO CURE**

PH IS AN
**INVISIBLE
ILLNESS...**
YOU CAN'T TELL
SOMEONE HAS IT
JUST BY LOOKING
AT THEM

THERE ARE
DIFFERENT TYPES
OF PH, WHICH CAN
BE CONNECTED TO
DIFFERENT DISEASES.
BUT SOME PEOPLE
**DEVELOP IT OUT OF
NOWHERE**
